What Should We Be Worried About?: Real Scenarios That Keep Scientists Up at Night (Edge Question Series) John Brockman

Drawing from the horizons of science, today's leading thinkers reveal the hidden threats nobody is talking about—and expose the false fears everyone else is distracted by.

What should we be worried about? That is the question John Brockman, publisher of Edge.org ("The world's smartest website"—*The Guardian*), posed to the planet's most influential minds. He asked them to disclose something that, for scientific reasons, worries them—particularly scenarios that aren't on the popular radar yet. Encompassing neuroscience, economics, philosophy, physics, psychology, biology, and more—here are 150 ideas that will revolutionize your understanding of the world.

Steven Pinker uncovers the real risk factors for war * Mihaly Csikszentmihalyi peers into the coming virtual abyss * Nobel laureate Frank Wilczek laments our squandered opportunities to prevent global catastrophe * Seth Lloyd calculates the threat of a financial black hole * Alison Gopnik on the loss of childhood * Nassim Nicholas Taleb explains why firefighters understand risk far better than economic "experts" * Matt Ridley on the alarming re-emergence of superstition * Daniel C. Dennett and George Dyson ponder the impact of a major breakdown of the Internet * Jennifer Jacquet fears human-induced damage to the planet due to "the Anthropocene Effect" * Douglas Rushkoff fears humanity is losing its soul * Nicholas Carr on the "patience deficit" * Tim O'Reilly foresees a coming new Dark Age * Scott Atran on the homogenization of human experience * Sherry Turkle explores what's lost when kids are constantly connected * Kevin Kelly outlines the looming "underpopulation bomb" * Helen Fisher on the fate of men * Lawrence Krauss dreads what we don't know about the universe * Susan Blackmore on the loss of manual skills * Kate Jeffery on the death of death * plus J. Craig Venter, Daniel Goleman, Virginia Heffernan, Sam Harris, Brian Eno, Martin Rees, and more

From reader reviews:

Roberto Senn:

Reading a book tends to be new life style on this era globalization. With reading you can get a lot of information that will give you benefit in your life. Together with book everyone in this world can share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story or even their experience. Not only the storyplot that share in the books. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on earth always try to improve their ability in writing, they also doing some study before they write to the book. One of them is this What Should We Be Worried About?: Real Scenarios That Keep Scientists Up at Night (Edge Question Series).

Eric Alaniz:

Your reading sixth sense will not betray a person, why because this What Should We Be Worried About?: Real Scenarios That Keep Scientists Up at Night (Edge Question Series) publication written by well-known writer whose to say well how to make book which can be understand by anyone who also read the book. Written throughout good manner for you, still dripping wet every ideas and publishing skill only for eliminate your current hunger then you still uncertainty What Should We Be Worried About?: Real Scenarios That Keep Scientists Up at Night (Edge Question Series) as good book not merely by the cover but also through the content. This is one guide that can break don't assess book by its deal with, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your reading sixth sense already told you so why you have to listening to a different sixth sense.

Ashley Gibson:

That reserve can make you to feel relax.
