## **Fundamentals of Chiropractic** Daniel Redwood, Carl Cleveland

This textbook introduces and explains basic chiropractic philosophy and history, principles, and applications in practice. In addition to covering chiropractic care techniques, it also discusses anatomy, biomechanics, and physiology, as well as spinal analysis and diagnostic procedures. Key scientific and philosophical issues within the chiropractic community are addressed. Clearly presented material in an easy-to-follow format defines unfamiliar terms, explains and illustrates concepts, and reinforces ideas through review and critical thinking questions. The book's broad scope and discussions of diverse topics make it ideal for students or anyone in the chiropractic community.

- Topics and content parallel the test plan outlines from the National Board of Chiropractic Examiners, ensuring that all material is relevant, up-to-date, and accurate.
- Well-known chapter contributors - some of the most respected and influential names in the field - give the book a balanced approach, reflecting the diversity within the profession on issues related to the science and philosophy of chiropractic.
- Well-referenced discussions include the most up-to-date research.
- Key terms and critical thinking/review questions in each chapter familiarize the reader with important concepts and promote a solid understanding of the material.
