Errol A. Gibbs

Five Foundations of Human Development (FFFD): Is our 'Material Driven Life' a Threat to the 'Spiritual Purpose' of Our Existence? "A book of 'hope' for the new millenium" Errol A. Gibbs

The authors take the reader on a "life-changing journey" guided by Western Christian thought, faith, belief and practice. Their discourse is not exclusively for Christians, but for all who believe in a revolution of "hope" and "optimism" informed by the universal message of "love" for "all" humanity. FFHD is a philosophical, religious and practical discourse on Five Foundations of Human Development. It offers compelling philosophical, analytical and empirical arguments for a better world, which is inherent in the worship of God, service to humanity, obedience to governing authorities and management of God's creation. The authors examine problems that we encounter daily, and they postulate solutions from Spiritual, moral, social, intellectual and physical perspectives. They essentially explore some of our past and present approaches to solutions to human problems. They propose new "revolutionary" approaches to human development that call the reader's attention to a new "enlightenment", new "hope" and new "optimism", informed by a new "Body of knowledge". The authors strive to explain the Christian message of God as delivered and taught by Jesus Christ, however it is not a work that is exclusively for Christians. Their discourse recognizes the comparable message and desire for the unity of humanity by other world religions. They present their discourse not as experts or giving expert advice, but simply as individuals with a desire to add another dimension of thought and enquiry to the vast storehouse of human knowledge. The primary purpose of their discourse is to demonstrate the positive benefits to humanity when Biblical (religious) perspectives underpin every human endeavor. These endeavors include (but are not limited to) family relations, national and international relations, engineering, science and technology, economics, history, education and health. These endeavors dictate human progress. Gibbs and Grey con
