Protein Lipidation Protocols (Methods in Molecular Biology)

Protein Lipidation Protocols (Methods in Molecular Biology)

It is hard to think of a protein in eukaryotic cells that does not undergo some type of posttranslational modification. The covalent attachment of lipids to proteins, protein lipidation, occurs for a few thousand proteins. Several functions for protein lipidation are known. Protein lipids may target proteins to specific cellular membranes, they may serve as molecular switches that allow cytosol-to-membrane transfer, they may direct protein-protein completion, and they may stabilize protein structure. In cases such as the fatty acylation of intracellular loops of transmembrane proteins, the functions of the protein lipidations are not known. This volume-Protein Lipidation Protocols-provides detailed methodologies for the study of these processes. Since this is a rapidly growing field, many new experimental techniques have been developing over the past few years. All of the experimental techniques described in this volume have emerged during this time. The editor has made a special effort to include only those techniques that have not been previously described in a "hands-on" format.

From reader reviews:

Connie Deroche:

The reserve with title Protein Lipidation Protocols (Methods in Molecular Biology) includes a lot of information that you can study it. You can get a lot of help after read this book. This specific book exist new knowledge the information that exist in this guide represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This kind of book will bring you throughout new era of the internationalization. You can read the e-book in your smart phone, so you can read it anywhere you want.

Carol Pyles:

Exactly why? Because this Protein Lipidation Protocols (Methods in Molecular Biology) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will surprise you with the secret the item inside. Reading this book next to it was fantastic author who write the book in such amazing way makes the content inside easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this ever again or you going to regret it. This unique book will give you a lot of benefits than the other book possess such as help improving your ability and your critical thinking technique. So , still want to hesitate having that book? If I have been you I will go to the book store hurriedly.

Rosalie Dietrich:

That guide can make you to feel relax. This particular book Protein Lipidation Protocols (Methods in Molecular Biology) was vibrant and of course has pictures around. As we know that book Protein Lipidation Protocols (Methods in Molecular Biology) has many kinds or genre. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading that.

Ian Bracy:

What is your hobby? Have you heard which question when you got pupils? We believe that that issue was given by teacher for their students. Many kinds of hobby, All people has different hobby. So you know that little person such as reading or as reading become their hobby. You have to know that reading is very important in addition to book as to be the matter. Book is important thing to provide you knowledge, except your own teacher or lecturer. You see good news or update about something by book. A substantial number of sorts of books that can you take to be your object. One of them is Protein Lipidation Protocols (Methods in Molecular Biology).
