There is a gaping hole in the history of the Holocaust. Between Adolf Hitler and Joseph Mengele there was a hierarchy of scientists whom were responsible for writing the infamous racial legislation of the Third Reich. These scientists, doctors, and legislators enjoyed prestigious positions in the various institutions within Hitler's Germany. To be more precise, many of the ghastly experiments credited to Mengele were ordered by this group of high-ranking scientists and doctors. Mengele was following their orders, yet many of these German doctors and scientists were set free after being captured by the Allies.

Previously unpublished manuscripts, correspondence, and conveniently forgotten publications reveal professional and political relationships as well as shared scientific convictions between high-profile American Progressives, British Fabian Socialists, and their German counterparts. The mounting evidence points to the long-standing designs and machinations of "*scientific racism*", a still poorly understood aspect of history.

This book documents the hundred year trajectory of the history of "*scientific racism*" from its initial intentions to create "a race of masters" to the Holocaust, which resulted from Hitler's conviction to create a "*master race*". These scientific prejudices and political dogmas are as relevant today as they were leading up to WWII. A thorough understanding of the origins of this movement is in order.

IMPORTANT NOTE: This copy is an **A.R.C.** (Advanced Readers' Copy). It is an edited preliminary to the hardcover version that will be published when all the books in the series are finished. This softcover version will only be different from the final as the research for the other books in the series dictate. The **A.R.C.** version will be retired upon the publishing of the hardcover version.
