Waging Modern War: Bosnia, Kosovo, and the Future of Combat

General Wesley K. Clark

Waging Modern War: Bosnia, Kosovo, and the Future of Combat General Wesley K. Clark

The Supreme Allied Commander who directed and won NATO's war in Kosovo offers a unique behind-the-scenes look at how the war was actually fought, and explains the conflict's surprising implications for how war will be waged in the decades to come. Ugly, shocking, frightening, war came to Europe once more in March 1999. The world watched in dismay as Yugoslavia's military machine attacked its own citizens in the province of Kosovo. Pictures of refugees fleeing and stories of murder and rape flashed to the top of the news. But this time, the United States and its allies intervened. Using an innovative, high-technology air operation, NATO brought modern military power to bear against Serb forces in the field and the machinery of repression that backed them up. It was modern war-limited in scope, measured in effect, extraordinarily complex in execution. The American commander who oversaw this massive military effort and managed the often incompatible demands of NATO's nineteen governments was General Wesley K. Clark. In *Waging Modern War*, Clark recounts not only the events that led to armed conflict, but also the context within which he made the key strategic decisions. He also describes, for the first time, the personal conflict he felt as he walked the tightrope of high diplomacy and military strategy and navigated the crushing restraints of domestic politics. Laying out the new realities of war-fighting and war-planning, Clark reveals how the American military infrastructure will have to adapt if it is to meet new threats. This is the story of war today, and as it will be fought tomorrow.
