Amorphous silicon solar cell technology has evolved considerably since the first amorphous silicon solar cells were made at RCA Laboratories in 1974. Scientists working in a number of laboratories worldwide have developed improved alloys based on hydrogenated amorphous silicon and microcrystalline silicon. Other scientists have developed new methods for growing these thin films while yet others have developed new photovoltaic (PV) device structures with improved conversion efficiencies. In the last two years, several companies have constructed multi-megawatt manufacturing plants that can produce large-area, multijunction amorphous silicon PV modules. A growing number of people believe that thin-film photovoltaics will be integrated into buildings on a large scale in the next few decades and will be able to make a major contribution to the world's energy needs. In this book, Ruud E. I. Schropp and Miro Zeman provide an authoritative overview of the current status of thin film solar cells based on amorphous and microcrystalline silicon. They review the significant developments that have occurred during the evolution of the technology and also discuss the most important recent innovations in the deposition of the materials, the understanding of the physics, and the fabrication and modeling of the devices.

From reader reviews:

Jason Nunez:

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite e-book and reading a book. Beside you can solve your condition; you can add your knowledge by the reserve entitled Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology). Try to make the book Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology) as your close friend. It means that it can for being your friend when you experience alone and beside that course make you smarter than ever. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know every thing by the book. So , let me make new experience and knowledge with this book.

Charles Shin:

This Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology) tend to be reliable for you who want to be described as a successful person, why. The explanation of this Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology) can be on the list of great books you must have will be giving you more than just simple examining food but feed a person with information that possibly will shock your preceding knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed people. Beside that this Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology) giving you an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that could it useful in your day pastime. So , let's have it and enjoy reading.

Robert Lofton:

Do you have something that that suits you such as book? The guide lovers usually prefer to opt for book like comic, brief story and the biggest some may be novel. Now, why not striving Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology) that give your satisfaction preference will be satisfied by means of reading this book. Reading routine all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be mentioned constantly that reading habit only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start examining as your good habit, it is possible to pick Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology) become your own starter.

Joseph Langley:

You will get this Amorphous and Microcrystalline Silicon Solar Cells: Modeling, Materials and Device Technology (Electronic Materials: Science & Technology) by go to the bookstore or Mall. Merely viewing or reviewing it can to be your solve trouble if you get difficulties for the knowledge. Kinds of this publication are various. Not only by simply written or printed and also can you enjoy this book simply by e-book. In the modern era like now, you just looking by your mobile phone and searching what your problem. Right now, choose your ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose suitable ways for you.
