An history of the earth: and animated nature: by Oliver Goldsmith. In eight volumes. ... [pt.2] Oliver Goldsmith

"HAVING given an account of the earth in general, and the advantages and inconveniencies with which it abounds, we now come to consider it more minutely. Having described the habitation, we are naturally led to enquire after the inhabitants. Amidst the infinitely different productions which the earth offers, and with which it is every where covered, animals hold the first rank; as well because of the finer formation of their parts as of their superior power. The vegetable, which is fixed to one spot, and obliged to wait for its accidental supplies of nourishment, may be considered as the prisoner of nature. Unable to correct the disadvantages of its situation, or to shield itself from the dangers that surround it, every object that has motion may be its destroyer.

This is an edition of a classical book first published in the eighteenth century.
