About the CompTIA A+ 220-801 and 220-802 Simulator

CompTIA A+ 220-801 and 220-802 Simulator helps you reinforce A+ exam topics and develop and enhance the hands-on skills you will need to succeed on the exams and on the job. This state-of-the-art, interactive simulation software presents you with 261 challenging labs that help you learn by doing, which is the most effective method of learning. The labs cover every A+ topic including installation, user accounts, and creating automatic backups. Security labs cover password policy, user permissions, file and folder

encryption, and the Windows Firewall. In troubleshooting labs, you learn how to start and stop services, use the Event Viewer logs to troubleshoot and track an attack, create a restore point, create a system image and a system repair disk, and schedule backups. Networking labs cover classes of private IP addresses and subnet masks, assigning DHCP addresses, and setting up an ad hoc wireless network. Then go beyond the operating system to get experience configuring your CMOS settings, upgrading hardware, and learning to identify and install a variety of devices. In addition to the wealth of hands-on exercises, this software comes complete with more than thirteen hours of video training by expert instructor Beth Smith.
