Technological advances in hardware and software provide powerful tools with the potential to design interfaces that are powerful and easy to use. Yet, the frustrations and convoluted "work-arounds" often encountered make it clear that there is substantial room for improvement. Drawn from more than 60 years of combined experience studying, implementing, and teaching about performance in human-technology systems, **Display and Interface Design: Subtle Science, Exact Art** provides a theoretically-based yet practical guide for ecological display and interface design.

Written from the perspective of cognitive systems engineering and ecological interface design, the book delineates how to design interfaces tailored to specific work demands, leverage the powerful perception-action skills of the human, and use powerful interface technologies wisely. This triadic approach (domain, human, interface) to display and interface design stands in sharp contrast to traditional dyadic (human, interface) approaches. The authors describe general principles and specific strategies at length and include concrete examples and extensive design tutorials that illustrate quite clearly how these principles and strategies can be applied. The coverage spans the entire continuum of interfaces that might need to be developed in today's work places.

The reason that good interfaces are few and far between is really quite simple: they are extremely difficult to design and build properly. While there are many books available that address display design, most of them focus on aesthetic principles but lack scientific rigor, or are descriptive but not prescriptive. Whether you are exploring the principles of interface design or designing and implementing interfaces, this book elucidates an overarching framework for design that can be applied to the broad spectrum of existing domains.

Eric Lowe:

Book will be written, printed, or outlined for everything. You can realize everything you want by a guide. Book has a different type. As we know that book is important matter to bring us around the world. Beside that you can your reading ability was fluently. A publication Display and Interface Design: Subtle Science, Exact Art will make you to become smarter. You can feel much more confidence if you can know about almost everything. But some of you think that will open or reading a book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or suited book with you?

Julie Ross:

As people who live in the actual modest era should be update about what going on or facts even knowledge to make these individuals keep up with the era that is always change and move forward. Some of you maybe can update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know which one you should start with. This Display and Interface Design: Subtle Science, Exact Art is our recommendation to help you keep up with the world. Why, as this book serves what you want and wish in this era.

Gail Beattie:

The e-book with title Display and Interface Design: Subtle Science, Exact Art contains a lot of information that you can study it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to understand how the improvement of the world. This specific book will bring you inside new era of the syndication. You can read the e-book with your smart phone, so you can read the idea anywhere you want.

Edward Johnson:

This Display and Interface Design: Subtle Science, Exact Art is great e-book for you because the content which can be full of information for you who all always deal with world and have to make decision every minute. That book reveal it information accurately using great coordinate word or we can point out no rambling sentences within it. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but tough core information with lovely delivering sentences. Having Display and Interface Design: Subtle Science, Exact Art in your hand like keeping the world in your arm, information in it is not ridiculous 1. We can say that no e-book that offer you world in ten or fifteen small right but this publication already do that. So , it is good reading book. Hey Mr. and Mrs. stressful do you still doubt which?
