Statistical Computing with R (Chapman & Hall/CRC The R Series) Maria L. Rizzo

Computational statistics and statistical computing are two areas that employ computational, graphical, and numerical approaches to solve statistical problems, making the versatile R language an ideal computing environment for these fields. One of the first books on these topics to feature R, **Statistical Computing with R** covers the traditional core material of computational statistics, with an emphasis on using the R language via an examples-based approach. Suitable for an introductory course in computational statistics or for self-study, it includes R code for all examples and R notes to help explain the R programming concepts.

After an overview of computational statistics and an introduction to the R computing environment, the book reviews some basic concepts in probability and classical statistical inference. Each subsequent chapter explores a specific topic in computational statistics. These chapters cover the simulation of random variables from probability distributions, the visualization of multivariate data, Monte Carlo integration and variance reduction methods, Monte Carlo methods in inference, bootstrap and jackknife, permutation tests, Markov chain Monte Carlo (MCMC) methods, and density estimation. The final chapter presents a selection of examples that illustrate the application of numerical methods using R functions.

Focusing on implementation rather than theory, this text serves as a balanced, accessible introduction to computational statistics and statistical computing.

From reader reviews:

Betty Benner:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their down time with their family, or their friends. Usually they performing activity like watching television, gonna beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to test look for book, may be the guide untitled Statistical Computing with R (Chapman & Hall/CRC The R Series) can be very good book to read. May be it could be best activity to you.

Randall Briggs:

Your reading sixth sense will not betray an individual, why because this Statistical Computing with R (Chapman & Hall/CRC The R Series) e-book written by well-known writer who really knows well how to make book that could be understand by anyone who also read the book. Written within good manner for you, still dripping wet every ideas and producing skill only for eliminate your current hunger then you still skepticism Statistical Computing with R (Chapman & Hall/CRC The R Series) as good book but not only by the cover but also with the content. This is one e-book that can break don't ascertain book by its cover, so do you still needing an additional sixth sense to pick this!?! Oh come on your reading through sixth sense already said so why you have to listening to one more sixth sense.

Luther Jensen:

This Statistical Computing with R (Chapman & Hall/CRC The R Series) is great e-book for you because the content which can be full of information for you who always deal with world and possess to make decision every minute. This particular book reveal it details accurately using great coordinate word or we can point out no rambling sentences inside. So if you are read the item hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but challenging core information with lovely delivering sentences. Having Statistical Computing with R (Chapman & Hall/CRC The R Series) in your hand like keeping the world in your arm, facts in it is not ridiculous one. We can say that no e-book that offer you world with ten or fifteen small right but this book already do that. So , this can be good reading book. Hey Mr. and Mrs. hectic do you still doubt that?

Eric Valentine:

What is your hobby? Have you heard in which question when you got pupils? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person such as reading or as looking at become their hobby. You need to understand that reading is very important and also book as to be the factor. Book is important thing to add you knowledge, except your current teacher or lecturer. You discover good news or update concerning something by book.

Amount types of books that can you choose to adopt be your object. One of them is Statistical Computing with R (Chapman & Hall/CRC The R Series).
