Structure Discovery in Natural Language (Theory and Applications of Natural Language Processing)

Chris Biemann

Current language technology is dominated by approaches that either enumerate a large set of rules, or are focused on a large amount of manually labelled data. The creation of both is time-consuming and expensive, which is commonly thought to be the reason why automated natural language understanding has still not made its way into “real-life” applications yet.

This book sets an ambitious goal: to shift the development of language processing systems to a much more automated setting than previous works. A new approach is defined: what if computers analysed large samples of language data on their own, identifying structural regularities that perform the necessary abstractions and generalisations in order to better understand language in the process?

After defining the framework of Structure Discovery and shedding light on the nature and the graphic structure of natural language data, several procedures are described that do exactly this: let the computer discover structures without supervision in order to boost the performance of language technology applications. Here, multilingual documents are sorted by language, word classes are identified, and semantic ambiguities are discovered and resolved without using a dictionary or other explicit human input. The book concludes with an outlook on the possibilities implied by this paradigm and sets the methods in perspective to human computer interaction.

The target audience are academics on all levels (undergraduate and graduate students, lecturers and professors) working in the fields of natural language processing and computational linguistics, as well as natural language engineers who are seeking to improve their systems.

From reader reviews:

Jerry Hernandez:

As people who live in typically the modest era should be change about what going on or data even knowledge to make all of them keep up with the era which is always change and make progress. Some of you maybe may update themselves by examining books. It is a good choice for you personally but the problems coming to you actually is you don't know which you should start with. This Structure Discovery in Natural Language (Theory and Applications of Natural Language Processing) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

Della Richardson:

The book untitled Structure Discovery in Natural Language (Theory and Applications of Natural Language Processing) contain a lot of information on the idea. The writer explains the woman idea with easy technique. The language is very simple to implement all the people, so do certainly not worry, you can easy to read that. The book was published by famous author. The author gives you in the new age of literary works. You can read this book because you can please read on your smart phone, or device, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and also order it. Have a nice read.

Cecil Atkins:

Don't be worry if you are afraid that this book will probably filled the space in your house, you might have it in e-book means, more simple and reachable. This Structure Discovery in Natural Language (Theory and Applications of Natural Language Processing) can give you a lot of buddies because by you checking out this one book you have factor that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This book offer you information that probably your friend doesn't understand, by knowing more than various other make you to be great men and women. So , why hesitate? We need to have Structure Discovery in Natural Language (Theory and Applications of Natural Language Processing).

Coralee Lowe:

Publication is one of source of knowledge. We can add our information from it. Not only for students and also native or citizen will need book to know the change information of year in order to year. As we know those books have many advantages. Beside most of us add our knowledge, also can bring us to around the world. Through the book Structure Discovery in Natural Language (Theory and Applications of Natural Language Processing) we can get more advantage. Don't one to be creative people? To be creative person must want to read a book. Just simply choose the best book that ideal with your aim. Don't end up being doubt to change your life at this book Structure Discovery in Natural Language (Theory and Applications of Natural Language Processing). You can more inviting than now.
